Claude Code

SDD

MCP

Full-stack developer with over 3 years of production experience, specializing in React, Next.js and TypeScript on the frontend, and Node.js/Python/Java on the backend. I work on high-traffic digital products, with proven experience integrating artificial intelligence solutions to automate processes and improve the user experience. Solid background in Computer Engineering (Udelar), with a focus on clean code, scalable architecture and delivering real value.

Work Experience

Full Stack Developer

Montevideo COMM · Jan 2023 – Present

I am part of the development team responsible for designing, building and maintaining high-traffic digital products, including Montevideo Portal. I work across both frontend and backend, contributing to architecture decisions and continuous delivery.

- Developed and maintained features for Montevideo Portal, a platform used by thousands of users.
- Implemented artificial intelligence solutions to automate internal processes and enhance the user experience across multiple platforms.
- Built backend endpoints and business logic with Node.js and Python, integrating with relational databases.
- Collaborated with the team on adopting Docker to standardize development environments and simplify deployments.

Personal Projects

Personal Portfolio

Next.js · TypeScript · Tailwind

Personal website showcasing projects and demos, built with Next.js and TypeScript. Includes automated CI/CD with GitHub Actions.

E-commerce Microservices

Java 25 · Spring Boot 4 · PostgreSQL · Docker

E-commerce platform split into microservices with hexagonal architecture and JWT authentication. Containerized with Docker Compose.

Spotify Clone

React · TypeScript · Express · PostgreSQL · Docker

Full-stack music streaming application with JWT authentication, playlist management and real-time playback. React + Tailwind frontend, Express backend with Prisma ORM, containerized with Docker Compose.

Chess Game

React · TypeScript · Tailwind

Interactive chess game with a complete rules implementation: move validation, check and checkmate detection, castling and a turn system. Clean architecture using the Factory, Strategy and Context+Reducer patterns.
